IRoC-U 2024: ISRO ROBOTICS CHALLENGE URSC

The team Giga Hertz from Toc H Institute of Science and Technology was selected to the next round of the IRoC-U 2024 Robotics Challenge to build an autonomous Lunar Rover with a Manipulator capable of traversing over rough terrains and handling and storing samples. The multidisciplinary team comprised of 6 students from BTech Robotics and Automation and two students each from BTech CSE and ME. The team overcame stiff competition to advance to the next round of the challenge. Toc H Management has supported the team by contributing a fund of Rs 1 lakh. Management has also provided all required facilities in terms of labs and technical assistance and space to support this project.

Hearty Congratulations

TocH Team Selected in the top 10% of teams at National level in the prestigious **ISRO Robotics Challenge - URSC 2024**

Student Members:

Abel Eugene D'silva (S6 RA), Adarsh K S (S6 RA), Aditya S Pillai (S6 ME), Akash Biju (S6 ME), Alwin Shibu (S6 RA), Bryan Abraham (S6 CSE), John Lukose Cochetto (S6 RA), John Agnel Pinhero (S6 RA), Levin Jeejan (S6 RA), Rohit Ramdas V (S6 CSE)

Samsung Solve for Tomorrow 2023

Team Demeter comprising Abdul Rahiman Jasbeer K A, Asheen Afthab M and Prithvi Ullas from BTech Robotics and Automation were selected among the top 10 teams from all over the country in the prestigious National Level Samsung Solve for Tomorrow 2023 competition. Solve for Tomorrow 2023 - a national education and innovation competition is a CSR initiative by Samsung India. The project mentors are Dr. Deepa Elizabeth George, Dr. Georgina Binoy Joseph and Asst. Prof. Nisanth Krishnan.

In the heart of India's green belt, Team Demeter harnesses advanced technologies to safeguard crops. The project on Smart Agriculture with UAV and VR that leverages drones to identify pests and diseases in crops captured the interest of the jury. Their efforts were acknowledged by various print and electronic media.

Patents Published

Three Indian patents were published by the Department of Electronics.

Patent 1: Title of the Invention: A System for a Solar-Powered Charging Station to Increase the Flight Distance Capabilities of Drones

Application No.202341064618 A, **Publication Date:** 22/12/2023

Names of Applicants and Inventors: Anfil Shajo, Dr. Georgina Binoy Joseph, Justin Joe, Alwin Jojo, Amal Prakash and Asst. Prof. Hashfi K. H. – **Department of Robotics and Automation**

UAVs such as drones can be used to deliver medicines and other essential materials between waypoints. If the distance between waypoints is very large, the drone has to be recharged at charging stations enroute to enable it to cover longer distances. The solar powered charging station is designed to be located by the drone at metre level accuracy.

Patent 2: Title of the Invention: Traffic Prediction Systems in Small Cities using AI

Application No. 202341010033A, Publication Date: 24/02/2023

Names of Applicants and Inventors: Dr. Deepa Elizabeth George, Dr. S. Perumal Sankar, Dr. Sreelekshmi S. – Department of Electronics

The system analyzes multi-source transportation travel survey data to obtain travel survey information of a survey area, estimating traffic data including: traffic speed and volume in a traffic link. AI based models are used to predict traffic information.

Patent 3: Title of the Invention: System & method for Health Care through IOT Wearables

Application No. 202221068832, Publication Date: 3/02/2023

Names of Applicants and Inventors: Dr. Sreelekshmi S. – Department of Electronics and Communication Engineering

The invention is related to a wearable sensor-based system that monitors the health parameters of the user and stores the data to keep track of all activities of the user. This invention helps in notifying the user's relatives in case of emergency scenarios. A wireless link has been created to transfer the data.

Prize Winners of PROCOMM 2023

A team comprising Akash K S, Akshay K, Athulya K Saju and Krishnapriya C Nair from BTech Electronics and Communication Engineering won the first prize for their project NeuroNav Chair in PROCOMM 2023 by IEEE ComSoc Kerala Chapter conducted on 2.10.2023 at RIT, Kottayam. The project was mentored by Dr. Deepa Elizabeth George and Asst. Prof. Sajitha K.S.

First Prize Winner

Prize Winners of Srishti 2023

Two teams from BTech Robotics and Automation won the second and third prizes in the Srishti 2023 Project Expo conducted on 10.11.2023 at JEC, Thrissur. The second prize was won by Alwin Jojo, Amal Prakash and Justin Joe for their project Med-Drone mentored by Dr. Georgina Binoy Joseph while the third prize was won by Anfil Shajo for his project Aqua Vision.

2nd Prize Winners

3rd Prize Winner

Prize Winners of Pegasus 2023

A team comprising Akshay Kannan, Miqudad, Devakrishna and Basil Shaju from BTech Robotics and Automation won the second prize for their project SparkLink in the Pegasus 2023 Project Expo conducted on 24.11.2023 at MITS, Kochi. The project was mentored by Asst. Prof. Hashfi K. H. and Dr. Georgina Binoy Joseph.

Second Prize Winner

Prize winners of InnoCon Expo @ Dhishna 2023

Med-Drone, a project of the students from BTech Robotics and Automation - Alwin Jojo, Amal Prakash, Anfil Shajo and Justin Joe mentored by Dr. Georgina Binoy Joseph was selected as one of the Top 3 projects in InnoCon Expo @ Dhishna 2023 at CUSAT on 25.11.2023.
